

Here is the compatibility chart for Smart IO.

The list below includes 9 different groups. Compatibility between different groups is not supported;

only products within the same group are compatible with each other.

For example, CNT-P400 and CNT-P100 cannot share a single Smart IO to run the communication program, as they belong to different groups.

In such cases, you must use two separate Smart IO units, each connected to products from their respective groups.

However, only one Smart HUB is required, even when using multiple Smart IO.

- 1) FOX-8STC
- 2) CNT-P100
- 3) CNT-P400, CNT-P410, CNT-P500, CNT-P600, CNT-P700, CNT-DR100
